This file is included with the DirectX runtime. You can download a free version of DirectX (DirectX9) from Microsoft. If you're using DirectX10 or DirectX11, you should be able to download a copy from your game distribution's website. Make sure you have the newest version of DirectX installed, and that you've closed all of your game applications. If you still receive this error message, you can try to reinstall your DirectX. It can take a while for the game to load and appear on screen. This is because the game will have to load all of its various assets and initialise the game engine. Some users are having trouble playing games on the latest version of Windows. Your computer will receive an error message saying that the game cannot run, and that the computer needs to be restarted. Microsoft has released a new version of the DirectX runtime. The new version has the following new features: New version of DirectX that enables cross-platform interoperability New error handling when using the DirectX APIs Improved error reporting for Windows Mobile and Windows Phone 7 Improved performance when drawing transparent objects Improved performance when displaying shaded 3D models in camera views Several bug fixes Make sure that your game has the latest version of DirectX installed, and that you've restarted your PC. If this does not help, please search for your DirectX version, and either buy a new version of DirectX (in which case, you will need to uninstall your current version first, and reinstall it), or contact your distribution and ask them to provide you with an updated version of the DirectX file. If you are using a Windows Phone 7 device, the software required to make the most out of your Windows Phone 7 game may not be compatible with your Windows Phone 7 device. Contact your phone manufacturer to see if there is a software update for your phone. Windows Phone 7 devices have a new feature called "Apps without Copy Protection" that lets users buy apps from the Windows Phone Marketplace and download the apps without being charged, and without the apps being installed on their device. When you try to play a game downloaded from the Marketplace, Windows Phone will try to install the app on your device. However, this will fail if the app has already been installed on your phone, or if the app uses "apps without copy protection". If this happens, you may be unable to play the game.
